SUMMARY

Data Analyst with 2+ years of experience using SQL, Python, and Power BI to analyze business data, automate reporting, and develop KPI dashboards. Experienced in translating complex datasets into actionable insights that support product decisions and operational improvements. Completing an MS in Data Analytics at Clark University.

SKILLS

- **Languages & Databases**: SQL, Python (Pandas, NumPy), PostgreSQL, Snowflake
- **Business Intelligence**: Power BI, Tableau, Excel, Dashboard Development, KPI Reporting, Data Visualization
- **Data Analysis**: Data Cleaning, Data Validation, Exploratory Data Analysis, ETL, Reporting Automation
- **Data Platforms & Tools**: PySpark, Databricks, Apache Airflow, REST APIs, AWS (S3), Docker, Git, GitHub Actions

EXPERIENCE

Corbig Technologies **Aug 2022 - Nov 2024**

Data Analyst *Kathmandu, Nepal*

- Built Power BI dashboards tracking learning progress, engagement, user acquisition, feature adoption, and system performance KPIs, giving 1,500+ students and product and engineering teams self-serve access to their data.
- Automated extraction, cleaning, transformation, and reporting for 8 weekly reports using Python, Pandas, and SQL, eliminating 10 hours of manual data preparation per week.
- Queried and analyzed 50,000+ student and application records in SQL and Python to uncover usage trends and performance patterns, informing engagement initiatives that contributed to an 8% increase in weekly active students.
- Partnered with product and engineering stakeholders to turn analysis findings into actionable recommendations, informing the prioritization of 3 features that increased feature adoption by 12%.

PROJECTS

LendingClub Borrower Risk Segmentation **Jan 2026 - May 2026**

PySpark, Databricks, SQL, Power BI

- Developed a PySpark pipeline in Databricks to clean, transform, and validate 396,030 loan records, preparing reliable data for borrower risk analysis and segmentation.
- Conducted exploratory analysis in SQL to profile default patterns across borrower attributes, then segmented borrowers by risk using KMeans and DBSCAN clustering and association rule mining.
- Presented risk segments and key findings in a Power BI report to inform risk-based lending decisions.

Global Inflation: Analysis and Visualization **Sep 2025 - Dec 2025**

Python, Pandas, NumPy, REST APIs, Apache Airflow, Docker, AWS (S3), GitHub Actions, Power BI

- Ingested multi-country inflation data from REST APIs with Python, then standardized and validated it with Pandas and NumPy to ensure data quality and consistency for analysis.
- Automated recurring data refreshes with a Dockerized Apache Airflow DAG that loads updated data into Amazon S3, backed by a GitHub Actions workflow that tests the DAG and builds the image on every push.
- Visualized and compared inflation trends across countries in an interactive Power BI dashboard.

EDUCATION

Clark University **Jan 2025 - Dec 2026**

Master of Science, Data Analytics *Worcester, MA*

- **GPA:** 3.87

Coventry University **Sep 2020 - Aug 2023**

Bachelor of Science (Hons), Computing *Kathmandu, Nepal*
